

Tasks and notifications in ZEPHYRx Breathe Easy app

ZEPHYRx has released a new 'Your Tasks' feature as part of the latest release of the Breathe Easy app (v1.10.0). This app version will allow a patient's provider to send reminders of Pulmonary Function Test and Breathing Exercise tasks. Once a reminder has been assigned, the patient will receive a notification to their phone or tablet of the task(s) to be completed. Patients will now be able to receive a notification when their provider invites them to a live remote session as well.

The new version of Breathe Easy will include a tab on the app home screen titled 'Your Tasks' that will show the tasks that have been assigned. Your Tasks will display your upcoming tasks and the status of your tasks (complete/ incomplete). Complete the task by selecting the task and taking your test/exercise.

The purpose of the Your Tasks feature is to remind patients to perform their pulmonary function testing and to encourage a testing schedule as recommended by your Provider. Reminders can be set at a frequency of daily, weekly, bi weekly, monthly, bi monthly or quarterly.
